

## Job Profile Fisheries Graduate

### Who We Are

Sea Farms Ltd is a major and leading supplier of seafood in the UK market. Sea Farms Ltd is a member of a global group of companies, Seafresh Group, involved in aquaculture, sourcing, processing and distribution of seafood products. Supply chains include wild and farmed aquatic species from European, Asian and American countries. Seafresh Group is fully committed to the sustainable development of its supply chains and works closely with selected long-term suppliers.

### The Role

Our team are looking for their next graduate to provide them with an exciting opportunity to learn all about our seafood business. You will work on rotation with our sustainability, technical and aquafeed teams for a total period of 2-years. By the end of the programme, you will understand the process of bringing new products to market with commercial, sustainability and technical functions to fully understand their role and influences on the process.

### Duties

- Developing knowledge of legal requirements, customer and certification standards.
- Collecting and analysing different types of information from both internal and external sources on fisheries and supply chains.
- Assessing the performance of supply chains against social compliance criteria, including human resources management practices.
- Analysing ingredient supply chains.
- Maintaining and developing our internal KPI tool.
- Assisting with research and reports.

### Qualifications and Skills

- BSc in marine biology or an aquatic related degree.
- Excellent level of written and spoken English is essential.
- An analytical mind combined with a proactive and positive attitude.
- Natural interest for hands-on work and day-to-day management.
- Capacity of working both independently and in team is expected.
- Excellent interpersonal and communication skills are key.

Position based in the UK with possible international travels and stays abroad.

Potential possibility of joining Sea Farms Ltd on a permanent basis at the end of the 2-year programme.

The successful candidate will report to the Fisheries manager.
